PROJECTS

SIX CRASH COURSE [Live Link](#) | [GitHub \[client\] Repo](#) | [GitHub \[server\] Repo](#)

- Students can download PDF content using the React PDF package. Firebase is used for user registration and login. A private route ensures that only logged-in users can access specific content. Tailwind CSS with daisyUI enhances the design. React Hot Toast is also utilized for a better user experience.

KRISHI SETU [Live Link](#) | [GitHub \[client\] Repo](#) | [GitHub \[server\] Repo](#)

- Krishi-Setu connects farmers and buyers through a modern web platform. It enables secure crop trading with features like interest management and real-time updates. By using React.js, Firebase for authentication, MongoDB for efficient data management, Tailwind CSS, and daisyUI for responsive design.

Dashboard [Live Link](#) [Github Link](#)

- Developed an impressive dashboard portfolio using React.js, Tailwind CSS, and Horizon UI. Features dynamic card components for displaying information, responsive design, and interactive UI.
